Thank you to our video stars!

Words will not express how grateful we are to the patients who participated in the awesome videos on our new website. Your voice matters! People in our community who seek the highest level of individual attention and health care would like to hear from you...and us!

We enjoyed working with UnoDeuce Media as well and recommend them for your next video story.

Thank you to Joe, Gaylon and Teresa, Katherine, Chuck and Lynne, Dr. Tiffany and kids, Andrea, Jessie and Gabe, Bee, Wayne, Ashlynn, Cindy, Jarryd and the Singo kids for all of your help!

Check Out Our New Website!

And We're Asking for YOUR Help!

After months of homespun effort our team launched our brand new website, complete with five new videos (on the home page and each of the service pages) and we want your input! It's a work in progress, so please help us with any ideas, questions, confusions or additional suggestions you might have.

P.S. Don't forget to share our website and videos with your family and friends!

Think Natural, Think Healthy, Think Essential Smiles!

Essential Smiles is a mouth rinse of medical grade essential oils—a blend of peppermint, clove, cinnamon, and lavender with xylitol (a natural sweetener) to defend your mouth from inflammatory microbes.

The overuse of antibiotics in dentistry have caused some of these harmful bugs to develop a resistance to antibiotics. Fortunately, these bugs do not appear to develop a tolerance or resistance to the anti-microbial affects of essential oils. We can now offer you a professional mouth rinse with therapeutic grade essential oils. Plus it tastes delicious! Ask anyone on our team more about Essential Smiles.

Our Mission

To treat each person with integrity, respect and kindness.

To help each person take a significant step toward his/her desired oral and systemic health.

To serve as leaders in our community in the quest toward whole health promotion and the partnership between all health professionals.

Announcing Total Health University !

We are so proud that our office represents the future of dentistry and it's role in *Total Health*. Following her mission to transform the dental profession to take a major role in the declining health of America, Dr. Susan has been traveling from state to state to teach. She has also been nudged to develop an on-line learning platform for dentists and dental teams across America so they can learn as a team, and at their own pace. If you are interested in a one-page handout on THU, we would be happy to provide one for you!

We will officially launch THU in 2017.

Consider a Health or Cosmetic GIFT for the Holidays

Are you looking for the perfect gift idea for someone you love who really needs a pick-me-up? Here's something that lasts longer than the latest fashion trend. Consider the gift of oral health, white six-month braces or teeth lightening. Whatever you decide to spend, we will boost you by 25%. We will take good care of your loved ones and make sure they have a wonderful and experience and an everlasting outcome!

Say Hello To the Golden Gate Bridge! Our Team is Going to San Francisco

It's our pleasure to help our profession take their place in off-setting the declining health of America. Leading the country in total health dentistry, we have the honor to teach together in San Francisco. We will teach seven other west coast dental offices for two full days.

By organizing 18 break-out sessions, Susan, Jean, Georgette, Molly, Anna and Kelly will each take a hands-on approach to helping other docs and team members learn how to implement such awesome practices as the infant oral health exam, Hands-On Learning Lab™, periodontal disease treatment, nutrition coaching, tobacco cessation, and screening for metabolic illnesses like diabetes, acid reflux, and obstructive sleep apnea. Several of us have not been to California, so when we are not working we will be playing, but it's likely it will look like we are playing even when we are teaching. If you want to hear more about our enthusiasm, just ask.
